January 10, 2023

Dear Provider:

On August 16, 2022, the Inflation Reduction Act of 2022 was signed into law. This law includes changes to Medicare Part D in relation to coverage of vaccines as well as cost-sharing for covered insulin.

We will be informing our members of the following insulin and vaccine benefits for the 2023 Farm Bureau Advantage HMO plan:

Medicare Advantage plans which offer a prescription drug plan must include enhanced benefits beginning January 1, 2023 as part of the Inflation Reduction Act of 2022.

Farm Bureau Advantage covers common vaccines like flu, pneumonia, COVID-19 and others, through the medical coverage the plan offers at no cost. If the vaccine is covered as part of the pharmacy benefit, then it is covered at no cost, even if the deductible hasn't been met yet.

Members who have a prescription for insulin will not pay more than \$35 for a one-month supply of each insulin covered by Farm Bureau Advantage HMO, no matter what cost-sharing tier it is on, even if there is a deductible that hasn't been met.

Thank you for being a valued provider for Farm Bureau Advantage HMO members.

Sincerely,

Farm Bureau Health Plans
